

(P-MGR)PWAIT(c)

(P-MGR)PWAIT(c)

NAME

(P-Mgr)pwait – message at termination of process-mgr-created process

SYNOPSIS

P_WAIT = 5

INPUT

```
struct {  
    struct msghdr hdr;  
    int buf[];  
};
```

VALUES

none

DESCRIPTION

The process manager updates its internal process tables and forwards a message to the parent of the terminating process. The *mstype* and *msident* fields in the message are those as specified by the parent process when the child process was created initially. These values are stored internally in the process manager tables.

DIAGNOSTICS

none
